## Security Status

### Top 10 Critical Apps

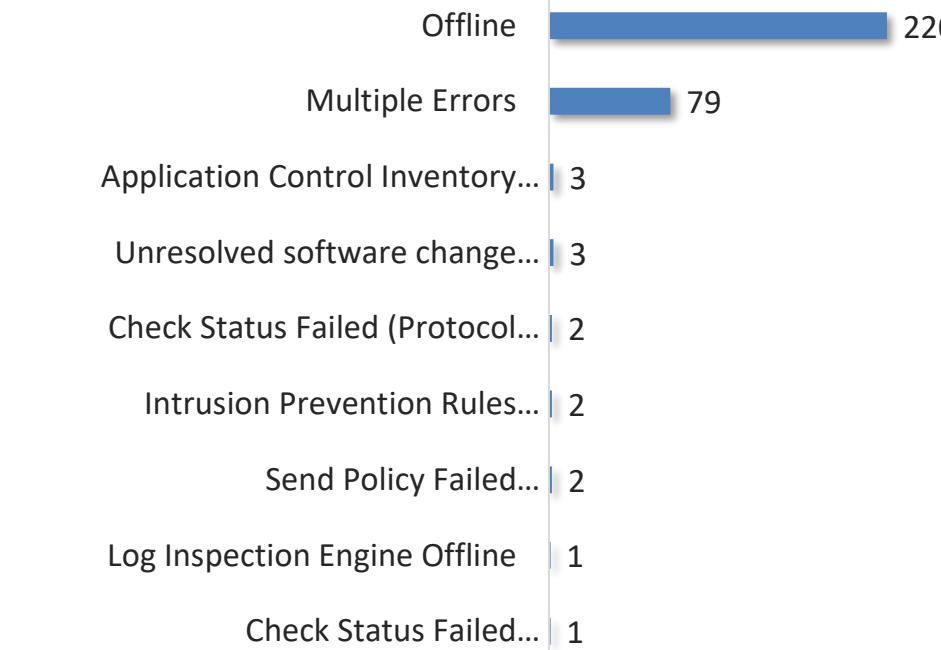

## Server & Workload Protection

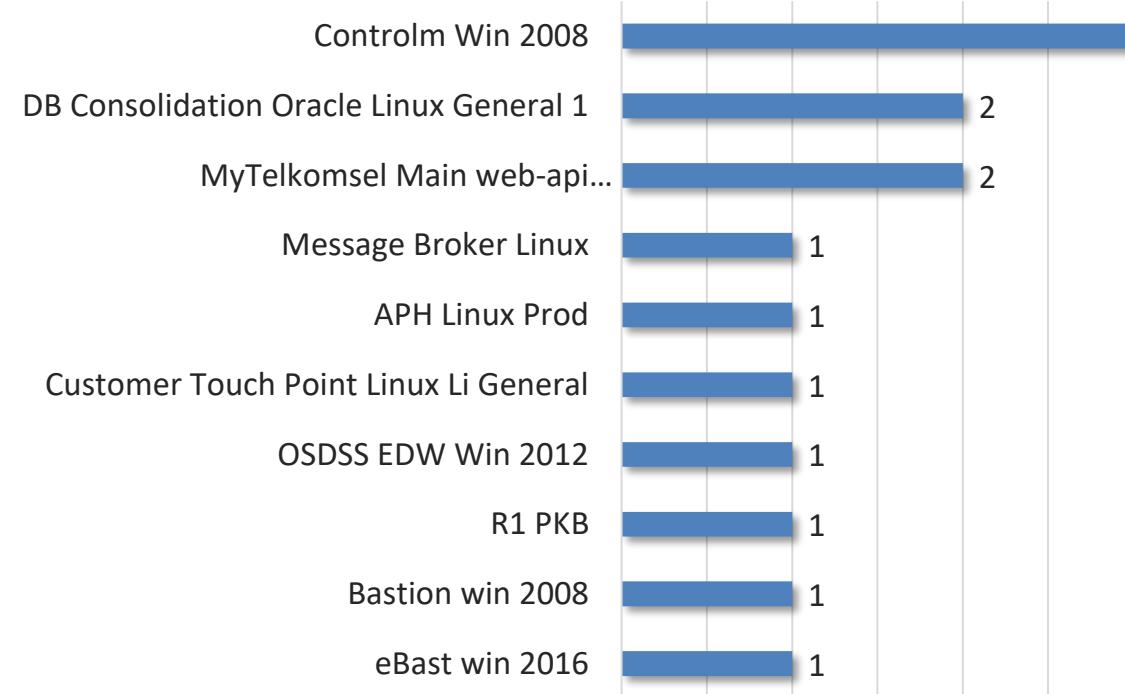

Managed [green] rate has reached 94%, indicating that 5,013 servers are protected. There are several agents reported as offline due to various reasons. From the 313 critical agent servers on SWP, there are a few issues on NGRS, while 247 servers belong to the Project Team. Additionally, some servers have been reported for dismantling.

### Critical Status

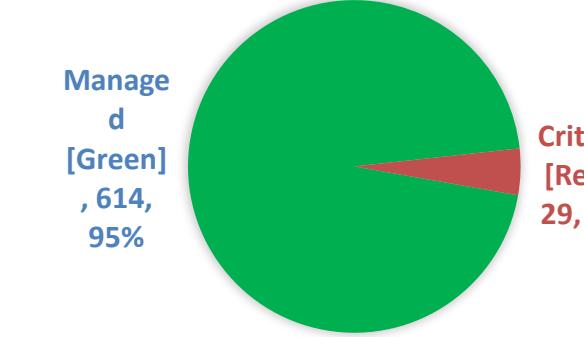

### Top 10 Critical Apps

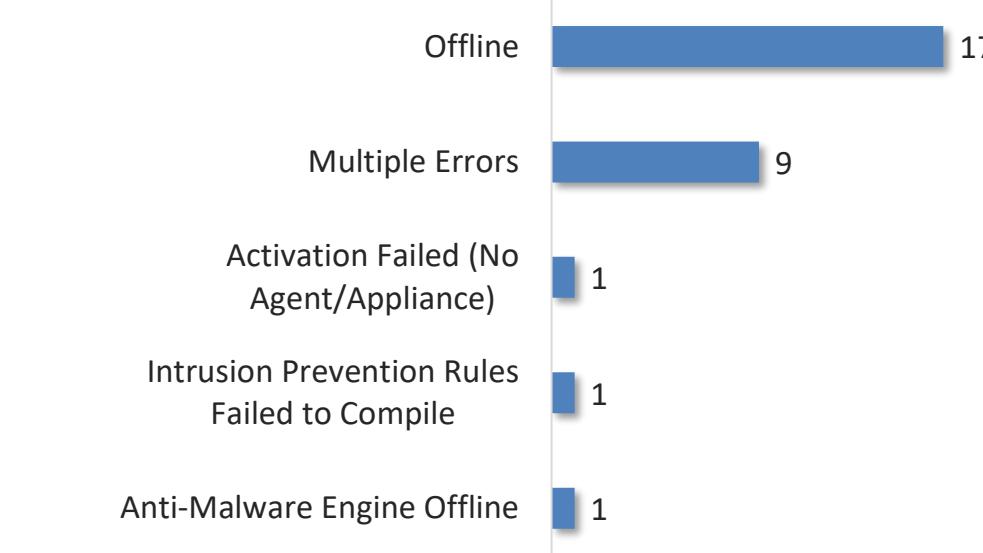

## Deep Security

Managed [green] rate has reached 95%, indicating that 614 servers are protected. Several agents are reported as offline due to various reasons.

### Critical Status

# Trend Micro

## Security Status

### AM event

The following threats were detected on hostnames and applications in the Anti-Malware Event module. All detected malware has been quarantined or removed from the servers.

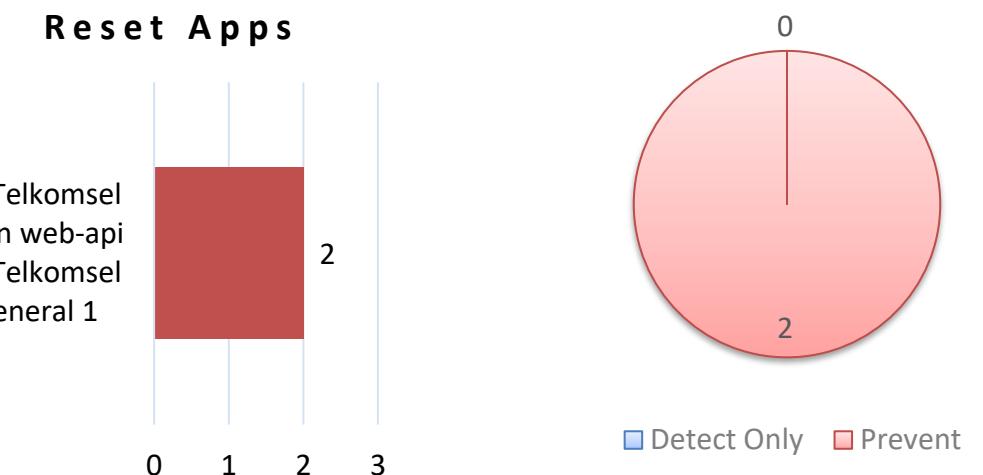

### Deep Security

No malware was detected on Deep Security on July 11, 2025.

The Intrusion Prevention Event module has two modes: Prevent and Detect Only. In Prevent mode, connections are blocked automatically. In Detect Only mode, we recommend that system administrators mitigate the issues by patching the impacted services. Below are the applications impacted under each mode. Each rule has a severity level ranging from Medium to Critical. All vulnerabilities detected by the IPS module have been followed up and are currently under review.

### IPS EVENT

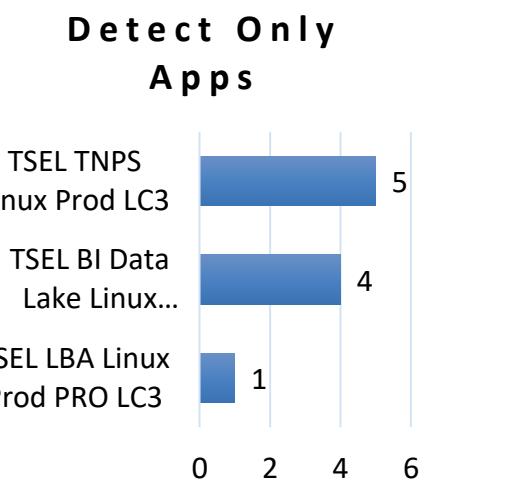

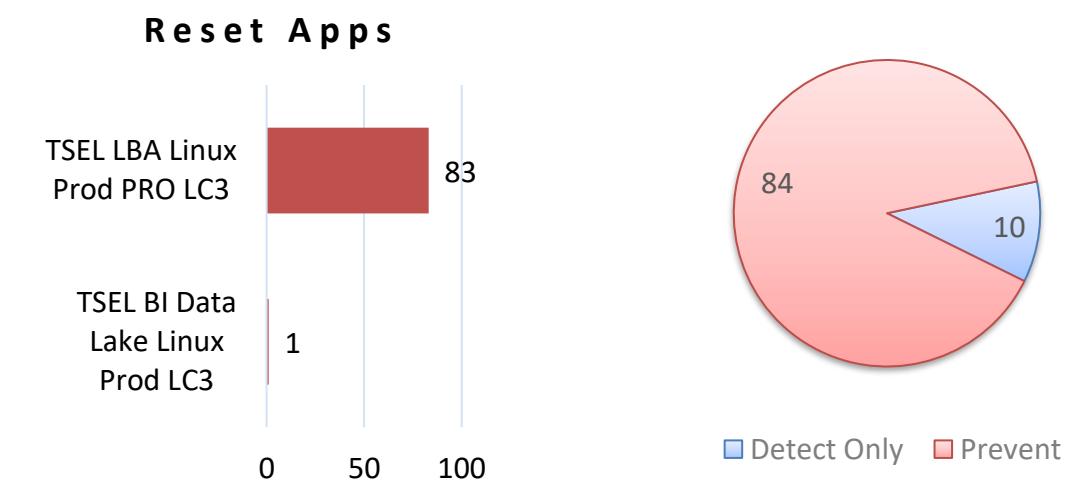

#### Deep Security

### Server & Workload Protection

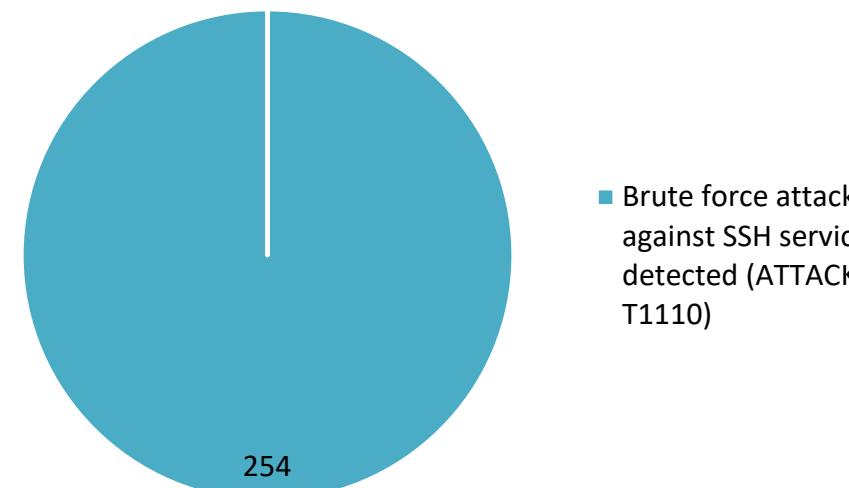

No malware was detected on SWP on July 11, 2025.

### Server & Workload Protection

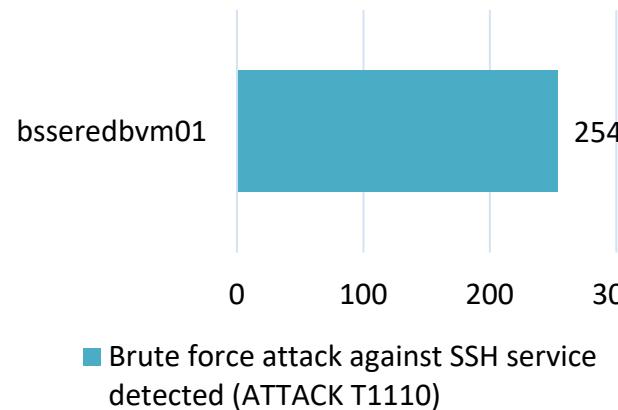

Note : There are some IPs that are already whitelisted because they are legit, IP VA, IP pentest, etc. It didn't include on report

### Deep Security

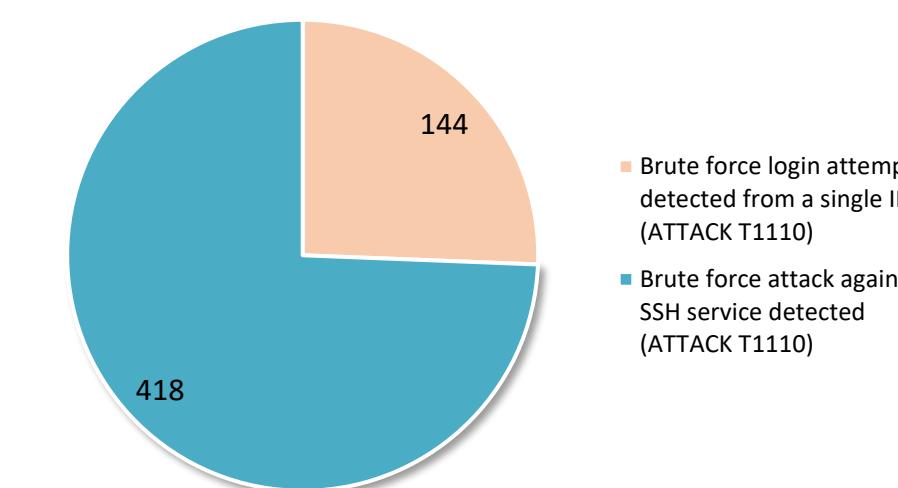

**Brute force attack against SSH service detected (ATTACK T1110)**

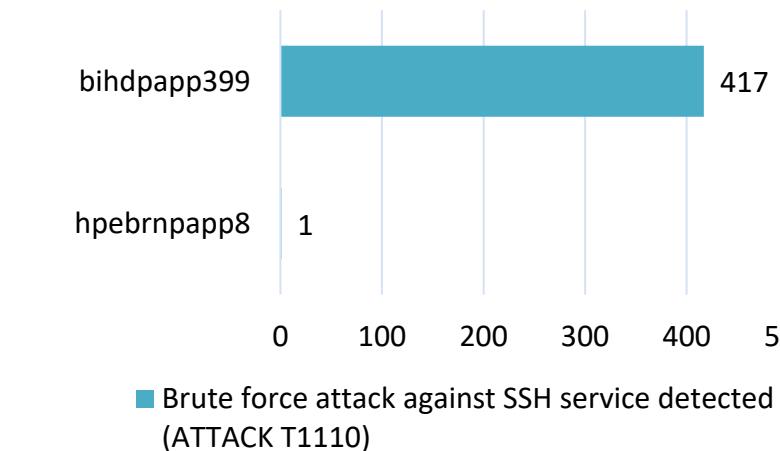

## LI event (Brute Forced & Log4j)

The following Brute Force and Log4j events were detected in the Log Inspection Event module. All findings have been reported to the SOC for further analysis.

### Server & Workload Protection

**Brute force attack against SSH service detected (ATTACK T1110)**

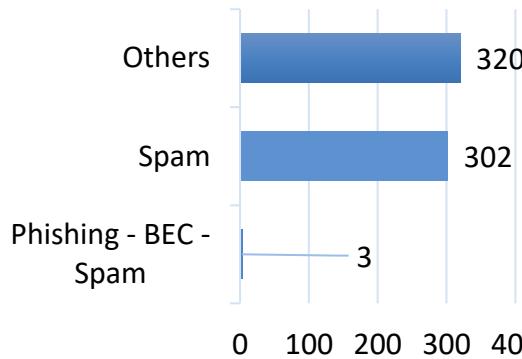

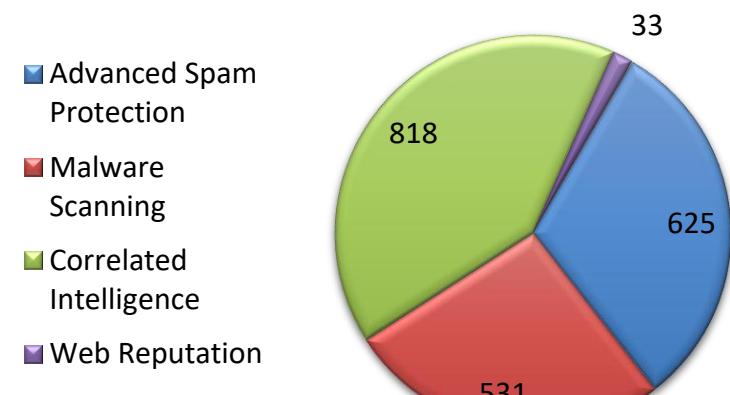

# Trend Micro

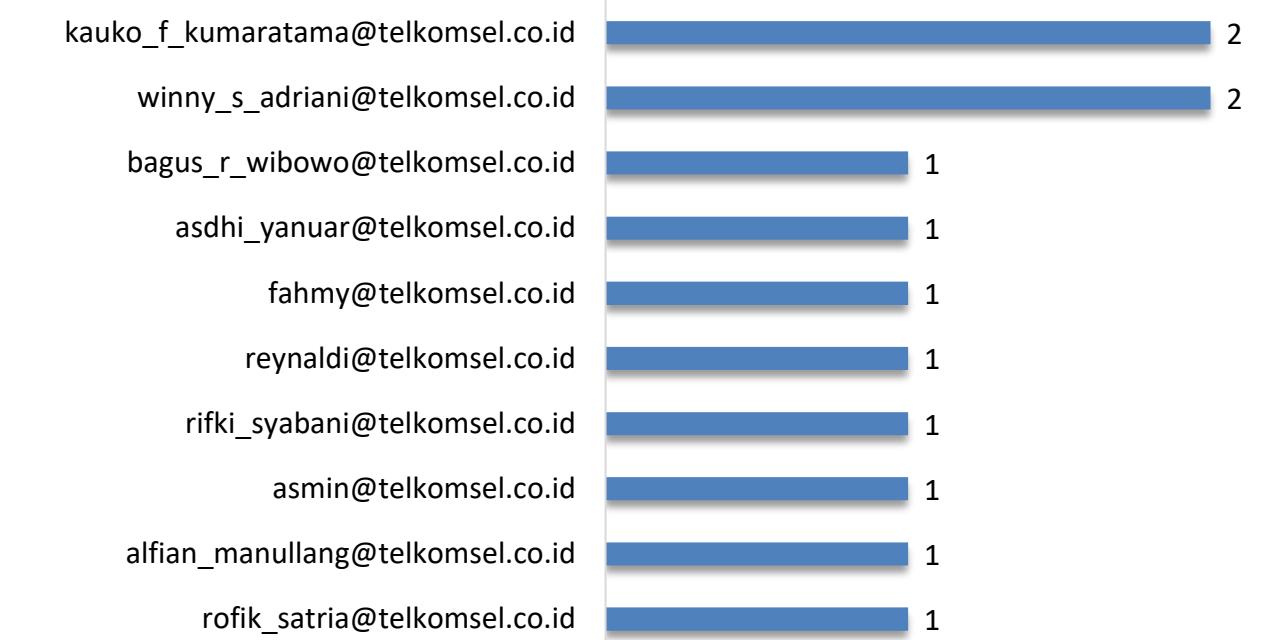

## Security Status

### Cloud Email & Collaboration Protection (CAS)

The following threats were detected in incoming messages by Cloud Email and Collaboration Protection. The threats are categorized into Spam, Phishing, BEC and Others. All suspicious emails have been quarantined or moved to the Junk folder.

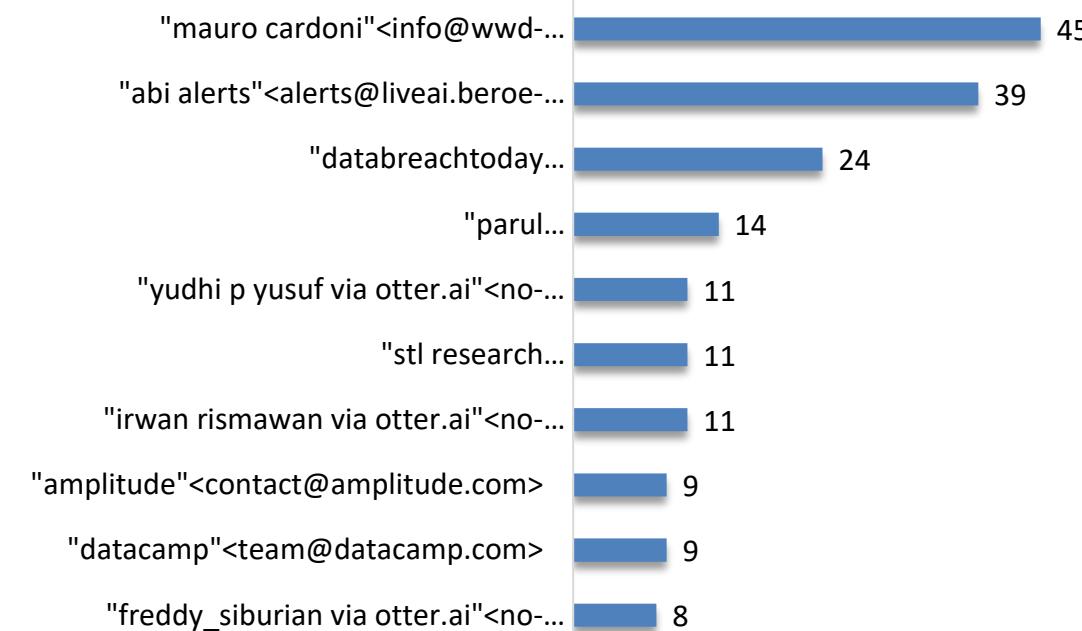

#### Top 10 User with Suspicious URLs

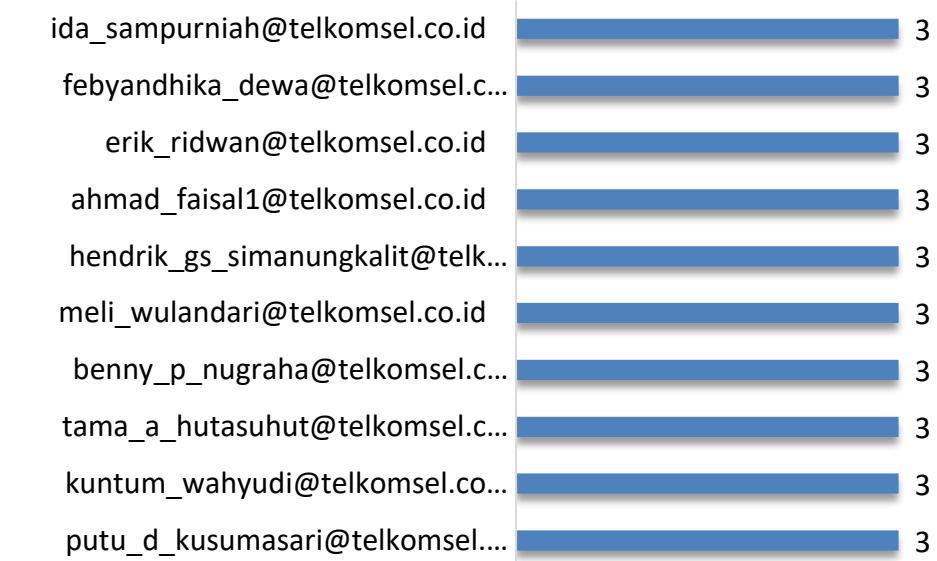

#### Purged Mail

No suspicious domains were detected on July 10, 2025.

#### Top 10 Spam Email Senders

#### Top 10 Recipients with Spam Email Messages
